Motivations

Yoga, with its deep spirituality, science, philosophy, is a world's humanity heritage that should not be reserved for few. It is born as an initiatory esoteric discipline, but now it is necessary to donate this precious thing to everyone without distinction. This is what Maharishi Patanjali did by codifying and rearranging Yoga through a path defined in the Yoga Sutra around Year Zero (400 BC / 400 AD).

And the choice of Bhopal as the site of project, it is not the random. First of all, because Patanjali birthplace is situated just a few km from Bhopal, second, because this beautiful city, which lies on the shores of three lakes, has the right, at least, a moral compensation from the West.

Our intention is to change the image of disaster caused by an “unconsciousness” Union Carbide and show what this city really is: a lively, fascinating city that deserve an “aware” tourism, that of the 300,000,000 followers of Yoga that have as a point of reference the great sage Patanjali. Not tourists but “voyagers”, to restore the luster to this wounded city, and, at the same time, to celebrate “the father of Yoga” Maharishi Patanjali.

is like turning on a light in the dark.
And as where there is the Light
can not enter the darkness,
so where is the knowledge
Ignorance can no longer enter.*
